ISO/TS 17536-5:2018 (E)

Road Vehicles — Aerosol separator performance test for internal combustion engines — Part 5: Engine fractional efficiency test method and upstream distribution sampling method

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms, definitions, and abbreviated terms

3.1 Terms and definitions
3.2 Abbreviated terms

4 Measurement accuracy

5 Test materials and test conditions

5.1 Test oil and aerosol
5.2 Absolute filter, wall flow trap and leakage
5.3 Test conditions
5.4 Aerosol Sampling System
5.5 Particle Counter(s) sizing and counting monitor(s)

6 Test procedure

6.1 General
6.2 Test equipment
6.3 Concentration Limit of the Particle Counter
6.4 100 % Efficiency Test and Development of Purge Time
6.5 Correlation Test
6.6 Particle Counter(s) Zero
6.7 Particle Counter(s) Sizing Accuracy
6.8 Summary of Qualification Test Requirements
6.9 Apparatus validation and maintenance

7 Test Procedures

7.1 General
7.2 Fractional Efficiency Test Procedure
7.3 Engine aerosol sampling procedure

8 Calculations and data acceptance criteria for the engine fractional efficiency test

8.1 General
8.2 Symbols and Subscripts used in the following equations
8.3 Test Sampling
8.4 Correlation Ratio
8.5 Penetration/Fractional efficiency
8.6 Efficiency
8.7 Data Reduction

Annex A (informative) Aerosol separator engine fractional efficiency test report

Annex B (normative) Test equipment

Annex C (normative) Poisson Statistics
