

ISO/TR 21190:2018-12 (E)

Electronic fee collection - Investigation of charging policies and technologies for future standardization

	Contents	Page
Foreword		v
Introduction		vi
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Abbreviated terms		2
5 Charging policies		4
5.1 General description		4
5.2 Conventional charging policies		4
5.2.1 Financial sources for road construction		4
5.2.2 Financial sources for road maintenance		4
5.2.3 Reduction for congestion in urban area		4
5.2.4 Internalizing external costs		5
5.2.5 Summary of conventional charging policies		5
5.3 New charging policies		5
5.3.1 Financial source for road construction with low cost devices		5
5.3.2 Financial source for road maintenance alternative to fuel tax		5
5.3.3 Provision of appropriate route or lane		6
5.3.4 Integration of C-ITS technology with EFC		6
5.3.5 Fair charging rates		6
5.3.6 Summary of new charging policies		6
5.4 Integrated charging policies		7
5.4.1 General		7
5.4.2 Financial source for road construction and maintenance		7
5.4.3 Traffic management by charging		7
5.4.4 Internalizing external costs		7
5.4.5 Fair charging rates		7
5.4.6 Summary of integrated charging policies		7
6 Functional requirements		8
6.1 EFC function		8
6.1.1 EFC functional model		8
6.1.2 Charging		9
6.1.3 Enforcement		11
6.1.4 Information provision		11
6.1.5 Payment		12
6.2 Relation between charging policies and EFC functions		12
6.3 EFC functional requirements		13
6.3.1 Charging		13
6.3.2 Enforcement		14
6.3.3 Information provision		14
6.3.4 Summary of EFC functional requirements		14
7 Technology for requirements		15
7.1 General		15

7.2	Charging	15
7.2.1	Distance driven	15
7.2.2	Vehicle class	16
7.2.3	Time class	16
7.2.4	Location class	16
7.2.5	Traffic conditions	16
7.2.6	Summary	16
7.3	Enforcement	17
7.3.1	Payment avoidance	17
7.3.2	Over loaded	18
7.3.3	Summary	18
7.4	Information provision	18
7.4.1	Tariff information	18
7.4.2	Level of services (LOS)	19
7.4.3	Charge amount	19
7.4.4	Summary	19
8	Charging technologies	20
8.1	General description	20
8.1.1	Eliminated EFC technologies or equipment	20
8.2	Existing technologies	21
8.2.1	DSRC	21
8.2.2	Autonomous systems (GNSS/CN)	21
8.2.3	ANPR	22
8.3	Emerging technologies	23
8.3.1	Probe data	23
8.3.2	Odometer	24
8.3.3	Passive RFID	24
8.3.4	WAVE	25
8.3.5	WIM	27
8.3.6	Other technologies	28
8.4	Consideration of mutual applicability	29
8.4.1	General	29
8.4.2	Existing technologies for new charging policies	29
8.4.3	Emerging technologies for conventional charging policies	29
8.4.4	Emerging technologies for new charging policies	29
9	Recommendations	30
9.1	General	30
9.1.1	Evaluation criteria	31
9.2	Evaluations	32
9.2.1	Charging assist traffic management	32
9.2.2	Passive UHF RFID-based EFC	32
9.2.3	Odometer-based EFC	32
9.2.4	ANPR based EFC	32
9.2.5	Toll-by-weight	33
9.2.6	WAVE based EFC	33
9.2.7	CN-5G for EFC	33
9.2.8	A-GNSS for EFC	33
9.3	Summary	33
Annex A (informative)	Application of technology to EFC systems	35
Annex B (informative)	Example of tariffs	43
Annex C (informative)	Comparison of communication technologies	51
Annex D (informative)	Examples of legislation for charging policy	61
Bibliography		63
