Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
3.1 General terms.....	2
3.2 Control modes.....	13
3.3 Architecture channel.....	13
3.4 Forward and reverse power transfer.....	13
3.5 Minimum and maximum energy request limits.....	13
3.6 Source generator modes.....	14
4 Abbreviated terms	14
5 Requirements	15
5.1 List of requirements.....	15
5.2 General communication requirements.....	15
5.3 User-specific requirements.....	16
5.3.1 Reliability, availability, error handling and error reporting.....	16
5.3.2 Private data protection.....	17
5.3.3 Ease of use.....	17
5.4 OEM-specific requirements.....	17
5.5 Utility-specific requirements.....	18
5.5.1 Power limiting for grid control or local energy control.....	18
5.5.2 Current and voltage limits for EV supply equipment protection.....	19
5.5.3 Current and voltage limits for EV protection.....	19
5.5.4 Authorization of charging services.....	19
5.5.5 Authorization of energy transfer from the EV to the EV supply equipment.....	20
5.5.6 Retrofitting.....	20
5.6 Wireless communication requirements.....	20
5.6.1 General.....	20
5.6.2 Communication infrastructure requirements.....	20
5.7 RPT description.....	21
5.7.1 General.....	21
5.7.2 General information and requirements.....	22
5.8 Traceability requirements.....	22
6 Actors	23
7 Use case elements	24
7.1 General.....	24
7.2 Task groups.....	25
7.3 Task groups description.....	26
7.3.1 Start of communication process [A].....	26
7.3.2 Plug-in and forced HLC.....	28
7.3.3 WA1: discovery with reservation.....	29
7.3.4 Plug-in with concurrent IEC 61851-1 and HLC.....	29
7.3.5 WA2: discovery without reservation.....	30

7.4	Communication set-up [B]	31
7.4.1	EVCC/SECC conductive communication set-up	31
7.4.2	WB1: EVCC/SECC wireless communication set-up	32
7.5	Certificate handling [C]	32
7.5.1	Certificate update	32
7.5.2	Certificate installation	33
7.6	Identification and authorization [D]	35
7.6.1	Overview	35
7.6.2	Authorization using contract certificates performed at the EV supply equipment	36
7.6.3	Authorization using contract certificates performed with the help of an SA	37
7.6.4	Authorization at the EV supply equipment using external credentials performed at the EV supply equipment	39
7.6.5	Authorization at the EV supply equipment using external credentials performed with the help of an SA	40
7.6.6	WD1: Authentication with prior reservation	41
7.7	Pairing and fine positioning	42
7.7.1	WP1: WPT fine positioning	42
7.7.2	WP2: WPT fine positioning without communication support	42
7.7.3	WP3: Conductive energy transfer pairing	43
7.7.4	WP4: WPT pairing	44
7.8	Target setting and energy transfer scheduling [E]	45
7.8.1	AC charging with load levelling based on HLC	45
7.8.2	WE1: WPT target setting and charge scheduling	46
7.8.3	Optimized charging with scheduling from secondary actors	46
7.8.4	DC charging with load levelling based on HLC	48
7.8.5	Resume to authorized charging schedule	49
7.8.6	Reverse power transfer with load levelling based on HLC	50
7.8.7	Reverse power transfer on stand-alone operation	51
7.8.8	Fast responding energy transfer services based on dynamic control mode	52
7.8.9	Managed bidirectional power transfer into the grid and/or into the home	54
7.9	Energy transfer controlling and re-scheduling [F]	56
7.9.1	Energy transfer loop	56
7.9.2	Energy transfer loop with metering information exchange	57
7.9.3	WF1: WPT charging loop	58
7.9.4	Energy transfer loop with interrupt from the SECC	59
7.9.5	Energy transfer loop with interrupt from the EVCC or USER	59
7.9.6	Energy transfer control based on dynamic control mode	60
7.10	Value-added services [G]	62
7.10.1	Value-added services	62
7.10.2	WG1: ACD system status check	63
7.10.3	Energy transfer details	64
7.11	End of energy transfer process [H]	64
7.11.1	General	64
7.11.2	End of energy transfer process	65
7.12	WPT end of charge WH1	66
7.12.1	General	66
7.12.2	WPT end of charge WH1	66
7.13	ACD connect/disconnect WI	68
7.13.1	ACD connect/disconnect WI	68
Annex A (informative) Conductive charging infrastructure architecture		69
Annex B (informative) Security		82
Annex C (informative) Examples of charging scenarios derived from the use case elements		88
Annex D (informative) Typical RPT system		106
Annex E (normative) Requirement list		108
Bibliography		116
