DIN CEN/TS 17400:2020-06 (E)

Intelligent transport systems - Urban ITS - Mixed vendor environments, methodologies & translators; English version CEN/TS 17400:2020

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Abbreviations 8

5 Mixed vendor environments in urban ITS 10
5.1 General 10
5.2 Interfaces between systems 11
5.3 Legacy and migration issues 13

6 MVE methodologies 14
6.1 Design methodologies 14
6.2 Public procurement constraints 16
6.3 Communications 17

7 Translators 19
7.1 Introduction 19
7.2 Specifications 21
7.3 Location of functional processing 21
7.4 Data storage and caching 22
7.5 Data models: concepts, definitions and units 23
7.6 Upper layer protocol adaptors 24
7.7 Communications network translation 24
7.8 Information security 25

Annex A (informative) Approach of DVM Exchange/IVERA to interoperability 26

A.1 Introduction 26

A.2 General architectural approach of DVM-Exchange 26

A.3 General architectural approach of IVERA 28

A.4 Procurement issues and impact 29

A.5 Management and governance 29

A.6 Example DVM Exchange/IVERA implementation: Deventer 30

Annex B (informative) Approach of OCIT to interoperability 32

B.1 Introduction 32

B.2 General architectural approach 33

B.3 Procurement issues and impact 33

B.4 Management 34

B.5 Example OCIT implementation 34

Annex C (informative) Approach of UTMC to interoperability **37**
C.1 Introduction **37**
C.2 General architectural approach **38**
C.3 Procurement issues and impact **40**
C.4 Management **41**
C.5 Example UTMC implementation: Reading **41**
Annex D (informative) Approach of RSMP to interoperability **43**
D.1 Introduction **43**
D.2 General architectural approach of RSMP **44**
D.3 Procurement issues and impact **46**
D.4 Management and governance **47**
Bibliography **48**
