

ISO/TR 21735:2019-07 (E)

Intelligent transport systems - Framework architecture for plug and play (PnP) functionality in vehicles utilizing nomadic devices

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	2
5	Conventions	2
6	Technical information	2
6.1	General descriptions	2
6.2	Framework architecture for in-vehicle PnP	3
6.3	Information transmission logic	3
6.4	Information from a PNP vehicle to occupants	4
6.4.1	General	4
6.4.2	Sensor related information	4
6.4.3	Communication related information	5
6.4.4	Mechanical related information	5
6.5	Information from occupant to PnP vehicle	5
6.5.1	General	5
6.5.2	Occupants' information	5
7	Use case scenario	5
7.1	Use case 1 -- Acceptance and denial of service usage	6
7.1.1	Overview	6
7.1.2	Description	6
7.1.3	Example	6
7.2	Use case 2 -- Ownership exchanging	7
7.2.1	Overview	7
7.2.2	Description	7
7.2.3	Example	8
7.3	Use case 3 -- Suggestion of optimum functional package	8
7.3.1	Overview	8
7.3.2	Description	8
7.3.3	Example	8
7.4	Use case 4 -- Mandatory operation of functional package	8
7.4.1	Overview	8
7.4.2	Description	8
7.4.3	Example	9
