

ISO/TR 21735:2019-07 (E)

Intelligent transport systems - Framework architecture for plug and play (PnP) functionality in vehicles utilizing nomadic devices

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	2
5 Conventions	2
6 Technical information	2
6.1 General descriptions	2
6.2 Framework architecture for in-vehicle PnP	3
6.3 Information transmission logic	3
6.4 Information from a PnP vehicle to occupants	4
6.4.1 General	4
6.4.2 Sensor related information	4
6.4.3 Communication related information	5
6.4.4 Mechanical related information	5
6.5 Information from occupant to PnP vehicle	5
6.5.1 General	5
6.5.2 Occupants' information	5
7 Use case scenario	5
7.1 Use case 1 -- Acceptance and denial of service usage	6
7.1.1 Overview	6
7.1.2 Description	6
7.1.3 Example	6
7.2 Use case 2 -- Ownership exchanging	7
7.2.1 Overview	7
7.2.2 Description	7
7.2.3 Example	8
7.3 Use case 3 -- Suggestion of optimum functional package	8
7.3.1 Overview	8
7.3.2 Description	8
7.3.3 Example	8
7.4 Use case 4 -- Mandatory operation of functional package	8
7.4.1 Overview	8
7.4.2 Description	8
7.4.3 Example	9
