ISO 19072-4:2019 (E)

Road vehicles — Connection interface for pyrotechnic devices, two-way and three-way connections — Part 4: Pyrotechnic device and harness connector assembly - type 2

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Dimensional features and performance requirements

4.1 General
4.2 Retainer and squib holder assembly
4.3 Coding and polarization
4.4 Mechanical shorting clip function
4.4.1 Dimensional features and properties
4.4.2 Requirements

5 Material characteristics

5.1 Contacts clip contact specifications
5.2 Retainer

Annex A (normative) Three-way (with ground) variant of the pyrotechnic device/initiator harness connector assembly

Annex B (normative) Gauge for minimum shorting clip opening
