

ISO 21782-1:2019 (E)

Electrically propelled road vehicles — Test specification for electric propulsion components — Part 1: General test conditions and definitions

Contents

| | |
|---------|--|
| | Foreword |
| | Introduction |
| 1 | Scope |
| 2 | Normative references |
| 3 | Terms and definitions |
| 4 | Abbreviated terms |
| 5 | General test conditions |
| 5.1 | Operating points |
| 5.2 | Provision for current, voltage and power measurement |
| 5.3 | DC input voltage |
| 5.4 | Temperature and humidity |
| 5.5 | Measurement accuracy |
| Annex A | (informative) Formula of power |
| A.1 | Inverter input power |
| A.2 | Average inverter input power |
| A.3 | Inverter output power |
| A.4 | Fundamental inverter output power |
| A.5 | Chopper input power |
| A.6 | Chopper output power |
| A.7 | Average chopper input power |
| A.8 | Average chopper output power |
| A.9 | Motor input power |
| A.10 | Motor output power |
