Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Abbreviated terms 3

5 Architectural concepts and information exchanges 3
5.1 General 3
5.2 Role model 3
5.3 Data flow model 4
5.4 Information exchanges between TC and RTM 5

6 General requirements for data exchange 6
6.1 General 6
6.2 Transaction: Set tariff scheme based on LOS 7
6.2.1 Overview 7
6.2.2 Message: LevelOfServiceAdu 7
6.2.3 Message: TariffSchemeAdu 8
6.3 Transaction: Levy toll 9
6.3.1 Overview 9
6.3.2 Message: RealTimeTollInformationAdu 10
6.3.3 Message: RoadUsageDataAdu 11
6.4 Transaction: Set tariff scheme based on travel demand model 12
6.4.1 Overview 12
6.4.2 Message: TariffSchemeRequestAdu 12
6.4.3 Message: TariffSchemeAdu 14
6.5 Privacy and quality of data 14

Annex A (normative) Data type specification 15

Annex B (normative) Implementation conformance statement proforma 16

Annex C (normative) Reference standards for data exchange 20

Annex D (informative) Smart route selection in Japan 23

Annex E (informative) Electronic Road Pricing (ERP) in Singapore 25

Annex F (informative) Managed lanes in the USA 27

Annex G (informative) Emission control using transit data in Japan 29

Annex H (informative) Data flow model of EFC support for traffic management 30

Annex I (informative) Example of data flows 31

Annex J (informative) Privacy and quality of data 32
