ISO 20854:2019-10 (E)

Thermal containers - Safety standard for refrigerating systems using flammable refrigerants - Requirements for design and operation

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Symbols and abbreviated terms 9

5 Safety requirements for the design of container refrigerating systems 9
5.1 General 9
5.2 Significant hazards of the refrigerating system 9
5.3 Safety concept for container refrigerating systems 10
5.3.1 General 10
5.3.2 Operational mode risk assessment 10
5.3.3 Tolerable risk 12
5.3.4 Flammable refrigerants 13
5.3.5 Protection against hazards 14
5.3.6 Validation of safety concept and protective devices 15

6 Design and construction of the refrigerating system 15
6.1 General 15
6.2 Components and piping of refrigerating systems with flammable refrigerant 16
6.2.1 General 16
6.2.2 Components 16
6.2.3 External fire relief device 16
6.3 Assemblies 16
6.3.1 General 16
6.3.2 Components and joints 17
6.4 Interior of the thermal container 17
6.4.1 General 17
6.4.2 Ventilation inside the container 17
6.4.3 Refrigerant detectors 17
6.4.4 Protection against hot surfaces 17
6.4.5 Electrical components 18
6.5 Outside electrical cabinet 18
6.6 Refrigerant charge 18
6.7 Alarm system 19
6.7.1 General 19
6.7.2 Alarm system power 19
6.8 Testing 19
6.8.1 General 19
6.8.2 Protective device test 19
6.8.3 Vibration type-test 20
6.8.4 Shock and impact type test 20
6.8.5 Production test 20
6.9 Marking and documentation 21
6.9.1 General 21

6.9.2 Marking ... 21
6.9.3 Manuals and documentation ... 22
6.10 Certification ... 23

7 Design related requirements of the MRU manufacturer for safe service, maintenance, repair ... 23
7.1 Education and training ... 24
7.2 Safety instructions ... 24
7.3 Testing before operation ... 24

7.4 Maintenance and repair ... 24

8 General recommendations at operating sites ... 25

9 Safe operation at different operating sites ... 26
9.1 General ... 26
9.2 Operating sites ... 27
9.3 Significant hazards ... 28
9.4 Ventilating condition at operating sites ... 29
9.4.1 Requirements for operation in open air ... 29
9.4.2 Requirements for operation in well-ventilated areas ... 29
9.4.3 Requirements for operation in non-well-ventilated areas ... 30
9.4.4 Container operation in non-ventilated areas ... 31
9.5 Requirements for opening of container door and for packing and un-packing of goods ... 31
9.6 Electrical installations at operating sites ... 32
9.7 Operator instruction for handling of alarms ... 32
9.8 Accidents ... 33
9.8.1 Measures for accidents prevention ... 33
9.8.2 Measures after accidents ... 34
9.9 Operating instructions, manuals, guidelines at operating sites ... 34
9.10 Information in the manual related to operating sites ... 34

10 Servicing recommendations and requirements at operating sites ... 35
10.1 Operating sites with service activities ... 35
10.2 General ... 35
10.2.1 Instruction of personnel ... 36
10.2.2 General failure prevention ... 36
10.3 Repair and maintenance on the container structure ... 36
10.4 Repair and maintenance on the MRU including opening of the refrigerating system ... 37
10.4.1 General ... 37
10.4.2 Instruction of personnel ... 37
10.4.3 Work area requirements ... 38
10.4.4 Inspection ... 38
10.4.5 System failures ... 38
10.4.6 Actions and procedure for repair and opening of the refrigerating system ... 39
10.4.7 Tools and equipment ... 41
10.4.8 Testing after repair ... 42
10.4.9 Failure prevention for repair and opening of the refrigerating system ... 42
10.4.10 Documentation ... 42
10.5 Handling, recovery, reuse and disposal of refrigerant ... 43

11 Decommissioning of the container refrigerating system ... 43

Annex A (informative) Definition of control volumes ... 44

Annex B (informative) Description of mechanisms to reduce risk ... 45

Annex C (normative) Information on leak types and leak mass flow ... 53

Annex D (normative) Useful equations for the calculation of ventilation environment ... 54

Bibliography ... 59
