

ISO 21956:2019-11 (E)

Road vehicles - Ergonomics aspects of transport information and control systems - Human machine interface specifications for keyless ignition systems

| Contents | Page |
|---|------|
| Foreword | iv |
| Introduction | v |
| 1 Scope | 1 |
| 2 Normative references | 1 |
| 3 Terms and definitions | 1 |
| 4 Design guidelines | 3 |
| 4.1 Actuation of keyless ignition control | 3 |
| 4.1.1 Actuation for emergency starting – Restarting the propulsion system after unintended engine stall | 3 |
| 4.1.2 Actuation for starting – Design to avoid accidental starting – Stationary vehicle .. | 3 |
| 4.1.3 Actuation for stopping while a vehicle with automatic start/stop is in run mode .. | 3 |
| 4.1.4 Actuation for stopping (commercial vehicles only) – Design to avoid accidental stopping - Stationary vehicle | 3 |
| 4.1.5 Actuation for emergency stopping – Interruption of starting | 3 |
| 4.2 Starting a propulsion system in case key code carrying device battery runs out | 3 |
| 4.2.1 Operation methods | 4 |
| 4.2.2 Instructions in case key code carrying device battery runs out | 4 |
| 4.3 Alerts and information to the driver | 4 |
| 4.3.1 Key left in vehicle | 4 |
| 4.3.2 Missing key code carrying device when starting vehicle propulsion system | 4 |
| 4.3.3 Ignition mode active at exit | 5 |
| 4.3.4 Ignition mode active at exit (commercial vehicles only) | 5 |
| 4.3.5 Key code carrying device leaves the vehicle | 5 |
| 4.3.6 Power shut off without key code carrying device | 6 |
| 4.3.7 Power shut off when not in “parked” or without activated parking brake for automatic transmission vehicles | 6 |
| 4.3.8 Power shut off when not in “parked” or “neutral” for automatic transmission vehicles (commercial vehicles only) | 7 |
| 4.3.9 Steering not unlocked | 7 |
| Annex A (informative) Keyless ignition control use cases | 8 |
| Bibliography | 11 |
