

ISO 21956:2019-11 (E)

Road vehicles - Ergonomics aspects of transport information and control systems - Human machine interface specifications for keyless ignition systems

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Design guidelines	3
4.1 Actuation of keyless ignition control.....	3
4.1.1 Actuation for emergency starting – Restarting the propulsion system after unintended engine stall.....	3
4.1.2 Actuation for starting – Design to avoid accidental starting – Stationary vehicle ..	3
4.1.3 Actuation for stopping while a vehicle with automatic start/stop is in run mode.	3
4.1.4 Actuation for stopping (commercial vehicles only) – Design to avoid accidental stopping - Stationary vehicle.....	3
4.1.5 Actuation for emergency stopping – Interruption of starting.....	3
4.2 Starting a propulsion system in case key code carrying device battery runs out.....	3
4.2.1 Operation methods.....	4
4.2.2 Instructions in case key code carrying device battery runs out.....	4
4.3 Alerts and information to the driver.....	4
4.3.1 Key left in vehicle.....	4
4.3.2 Missing key code carrying device when starting vehicle propulsion system.....	4
4.3.3 Ignition mode active at exit.....	5
4.3.4 Ignition mode active at exit (commercial vehicles only).....	5
4.3.5 Key code carrying device leaves the vehicle.....	5
4.3.6 Power shut off without key code carrying device.....	6
4.3.7 Power shut off when not in “parked” or without activated parking brake for automatic transmission vehicles.....	6
4.3.8 Power shut off when not in “parked” or “neutral” for automatic transmission vehicles (commercial vehicles only).....	7
4.3.9 Steering not unlocked.....	7
Annex A (informative) Keyless ignition control use cases	8
Bibliography	11
