

# ISO 21956:2019-11 (E)

## Road vehicles - Ergonomics aspects of transport information and control systems - Human machine interface specifications for keyless ignition systems

---

<b>Contents</b>		<b>Page</b>
<b>Foreword</b>		<b>iv</b>
<b>Introduction</b>		<b>v</b>
<b>1</b>	<b>Scope</b>	<b>1</b>
<b>2</b>	<b>Normative references</b>	<b>1</b>
<b>3</b>	<b>Terms and definitions</b>	<b>1</b>
<b>4</b>	<b>Design guidelines</b>	<b>3</b>
4.1	Actuation of keyless ignition control	3
4.1.1	Actuation for emergency starting – Restarting the propulsion system after unintended engine stall	3
4.1.2	Actuation for starting – Design to avoid accidental starting – Stationary vehicle	3
4.1.3	Actuation for stopping while a vehicle with automatic start/stop is in run mode	3
4.1.4	Actuation for stopping (commercial vehicles only) – Design to avoid accidental stopping - Stationary vehicle	3
4.1.5	Actuation for emergency stopping – Interruption of starting	3
4.2	Starting a propulsion system in case key code carrying device battery runs out	3
4.2.1	Operation methods	4
4.2.2	Instructions in case key code carrying device battery runs out	4
4.3	Alerts and information to the driver	4
4.3.1	Key left in vehicle	4
4.3.2	Missing key code carrying device when starting vehicle propulsion system	4
4.3.3	Ignition mode active at exit	5
4.3.4	Ignition mode active at exit (commercial vehicles only)	5
4.3.5	Key code carrying device leaves the vehicle	5
4.3.6	Power shut off without key code carrying device	6
4.3.7	Power shut off when not in “parked” or without activated parking brake for automatic transmission vehicles	6
4.3.8	Power shut off when not in “parked” or “neutral” for automatic transmission vehicles (commercial vehicles only)	7
4.3.9	Steering not unlocked	7
<b>Annex A (informative)</b>	<b>Keyless ignition control use cases</b>	<b>8</b>
<b>Bibliography</b>		<b>11</b>
