Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 Symbols 3

5 Requirements 3
5.1 Minimum enabling capabilities 3
5.2 Operating model -- State transition diagram 4
5.2.1 General 4
5.2.2 State functional descriptions 4
5.3 System types 5
5.4 System classes 5
5.5 Performance requirements 5
5.5.1 General 5
5.5.2 Hazardous situation 5
5.5.3 Operating speed 6
5.5.4 Horizontal curve radius capability 7
5.5.5 Countermeasure requirements 7
5.5.6 Driver controls and human interface 8

6 Test procedures 9
6.1 General 9
6.2 Bicyclist test target specification 9
6.2.1 Test target physical characteristics 9
6.2.2 Detectability specifications 9
6.3 Environmental conditions 9
6.3.1 General 9
6.3.2 Driving surface 9
6.3.3 Ambient air temperature 9
6.3.4 Horizontal visibility 9
6.3.5 Ambient illumination 10
6.4 Test procedure for longitudinal scenario (limited dynamic-test) 12
6.5 Test procedure for crossing scenario (limited dynamic-test) 13

Annex A (informative) Information relative to BDCMS 15
