

ISO/TR 21186-2:2021 (E)

Cooperative intelligent transport systems (C-ITS) — Guidelines on the usage of standards — Part 2: Hybrid communications

Contents

| | |
|---------|--|
| | Foreword |
| | Introduction |
| 1 | Scope |
| 2 | Normative references |
| 3 | Terms and definitions |
| 4 | Symbols and abbreviated terms |
| 5 | Motivations for hybrid communications support |
| 5.1 | Connected and cooperative mobility |
| 5.2 | Examples of use cases requiring a diversity of access technologies |
| 5.2.1 | Road hazard notification (use case 1) |
| 5.2.2 | Emergency call (use case 2) |
| 5.2.3 | Public transport (use case 3) |
| 5.3 | Hybrid communication technologies |
| 5.4 | Unified communication and data management architecture |
| 5.4.1 | Requirements for the unified communication and data management architecture |
| 5.4.2 | Supporting a diversity of applications with diverging communication needs |
| 5.4.3 | Supporting a diversity of communication paths |
| 5.4.4 | Supporting a diversity of access technologies and protocols |
| 5.4.4.1 | Networked communications in the ITS station |
| 5.4.4.2 | Localized communications in the ITS station |
| 6 | The ITS station architecture and functionalities in support of hybrid communications |
| 6.1 | Origins of the ITS station architecture |
| 6.2 | Detailed ITS station architecture |
| 6.3 | Design principles of the ITS station architecture |
| 6.4 | ITS station functionalities in support for hybrid communications |
| 6.5 | ITS station management entity |
| 6.6 | ITS station capabilities |
| 6.7 | ITS station service managed entity (ITS-S MSE) |
| 6.8 | Management of data flow types (ITS-S flow type) |
| 6.9 | Management of communication paths (ITS-S path) |
| 6.10 | Management of communication profiles (ITS-SCP) |
| 6.11 | Management of communication handovers |
| 6.12 | Management of globally unique identifiers |
| 6.13 | Standards necessary in support of hybrid communications |
| 7 | How to develop ITS application standards |
| 7.1 | Generic development principle |
| 7.2 | Specifying ITS-S application process |
| 7.3 | Defining data flow communication requirements |
| 7.4 | Registering communication requirements |
| 7.5 | Transmitting data |
