## Intelligent transport systems - Architecture - Applicability of data distribution technologies within ITS

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Abbreviated terms .....	2
5	Transitioning from traditional to cooperative thinking .....	4
5.1	General .....	4
5.1.1	Need for data exchanges .....	4
5.1.2	Data distribution functionality .....	5
5.2	Systems engineering process .....	6
5.2.1	Conceptualization .....	6
5.2.2	System architecture .....	6
5.2.3	System design .....	6
5.3	Traditional silos versus cooperative approaches .....	7
6	Summary of needs and considerations .....	7
6.1	General .....	7
6.2	Types of information flows .....	7
6.2.1	General .....	7
6.2.2	Non-emergency information sharing .....	8
6.2.3	Emergency information sharing .....	8
6.2.4	Control flows .....	8
6.2.5	Interrogatives .....	8
6.2.6	Local exchanges .....	8
6.3	Characteristics .....	8
6.4	Solution characteristics .....	9
6.4.1	General .....	9
6.4.2	Architectural topology .....	9
6.4.3	Technology maturity and deployment characteristics .....	13
6.5	Objective analysis .....	15
6.5.1	General .....	15
6.5.2	Protocols tested .....	15
6.5.3	Protocols considered and not analysed .....	16
6.5.4	Protocols considered and investigated but not tested .....	17
6.5.5	Summary .....	17
7	Summary of analysis results .....	18
7.1	General .....	18
7.2	Quantitative results .....	18
7.2.1	General .....	18
7.2.2	Many2One .....	18
7.2.3	One2Many .....	20
7.2.4	10 to Many .....	21
7.2.5	50 to Many .....	23

7.2.6	N to N .....	24
7.2.7	Latency as a function of completion percentage .....	29
7.2.8	Other tests .....	30
7.3	Qualitative lessons learned .....	31
8	Summary of protocol characteristics and applicability to ITS .....	31
9	Conclusion .....	35
	Annex A (informative) Test environment .....	37
	Bibliography .....	40
