## Intelligent transport systems - Architecture - Applicability of data distribution technologies within ITS

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | v           |
| Introduction ..... |  | vi          |
| 1                  | Scope .....  | 1           |
| 2                  | Normative references .....                                   | 1           |
| 3                  | Terms and definitions .....                                  | 1           |
| 4                  | Abbreviated terms .....                                      | 2           |
| 5                  | Transitioning from traditional to cooperative thinking ..... | 4           |
| 5.1                | General .....  | 4           |
| 5.1.1              | Need for data exchanges .....                                | 4           |
| 5.1.2              | Data distribution functionality .....                        | 5           |
| 5.2                | Systems engineering process .....                            | 6           |
| 5.2.1              | Conceptualization .....                                      | 6           |
| 5.2.2              | System architecture .....                                    | 6           |
| 5.2.3              | System design .....  | 6           |
| 5.3                | Traditional silos versus cooperative approaches .....        | 7           |
| 6                  | Summary of needs and considerations .....                    | 7           |
| 6.1                | General .....  | 7           |
| 6.2                | Types of information flows .....                             | 7           |
| 6.2.1              | General .....  | 7           |
| 6.2.2              | Non-emergency information sharing .....                      | 8           |
| 6.2.3              | Emergency information sharing .....                          | 8           |
| 6.2.4              | Control flows .....  | 8           |
| 6.2.5              | Interrogatives .....   | 8           |
| 6.2.6              | Local exchanges .....  | 8           |
| 6.3                | Characteristics .....  | 8           |
| 6.4                | Solution characteristics .....                               | 9           |
| 6.4.1              | General .....  | 9           |
| 6.4.2              | Architectural topology .....                                 | 9           |
| 6.4.3              | Technology maturity and deployment characteristics .....     | 13          |
| 6.5                | Objective analysis .....                                     | 15          |
| 6.5.1              | General .....  | 15          |
| 6.5.2              | Protocols tested .....                                       | 15          |
| 6.5.3              | Protocols considered and not analysed .....                  | 16          |
| 6.5.4              | Protocols considered and investigated but not tested .....   | 17          |
| 6.5.5              | Summary .....  | 17          |
| 7                  | Summary of analysis results .....                            | 18          |
| 7.1                | General .....  | 18          |
| 7.2                | Quantitative results .....                                   | 18          |
| 7.2.1              | General .....  | 18          |
| 7.2.2              | Many2One .....   | 18          |
| 7.2.3              | One2Many .....   | 20          |
| 7.2.4              | 10 to Many .....   | 21          |
| 7.2.5              | 50 to Many .....   | 23          |

|       |  |    |
|-------|--|----|
| 7.2.6 | N to N .....   | 24 |
| 7.2.7 | Latency as a function of completion percentage .....               | 29 |
| 7.2.8 | Other tests .....  | 30 |
| 7.3   | Qualitative lessons learned .....                                  | 31 |
| 8     | Summary of protocol characteristics and applicability to ITS ..... | 31 |
| 9     | Conclusion .....   | 35 |
|       | Annex A (informative) Test environment .....                       | 37 |
|       | Bibliography .....   | 40 |
