ISO 23795-1:2022-05 (E)

Intelligent transpor t systems - Extracting trip data using nomadic and mobile devices for estimating CO_2 emissions - Part 1: Fuel consumption determination for fleet manag ement

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Abbreviated terms 2

5 Method for fuel consumption determination for fleet management 3
5.1 Introduction 3
5.2 Conventions of applied Newtonian physics 3
5.3 Explanation 5
5.4 Relevance of energy equation for nomadic devices 5
5.5 Example of the presented methodology 6

Annex A (informative) Concept for implementation 10

Annex B (informative) Application of the method in a use case study -- Examples and results 20

Bibliography 31
