

ISO/TS 20684-4:2022-10 (E)

Intelligent transport systems - Roadside modules SNMP data interface - Part 4: Notifications

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Conformance	2
5	User needs	3
5.1	Monitor user-defined exceptions in real-time	3
5.1.1	Real-time notifications user need	3
5.1.2	Monitor user-defined exceptions in real-time overview	3
5.1.3	Graphical relationships	4
6	Requirements	6
6.1	Notification aggregator	6
6.1.1	Notification aggregator definition	6
6.1.2	Notification aggregator data exchange requirements	6
6.1.3	Notification aggregator capability requirements	6
6.1.4	Notification aggregator logic	6
6.2	Notification channel	7
6.2.1	Notification channel definition	7
6.2.2	Notification channel data exchange requirements	7
6.2.3	Notification channel capability requirements	8
6.2.4	Notification transmission logic	8
6.3	Notification event	10
6.3.1	Notification event definition	10
6.3.2	Notification event contents	10
6.3.3	Maximum data size	10
6.3.4	Timestamp latency	10
6.3.5	Timestamp resolution	11
6.4	Notification factory	11
6.4.1	Notification factory definition	11
6.4.2	Notification factory data exchange requirements	11
6.4.3	Notification factory capabilities	12
6.4.4	Generate a notification	12
6.5	Notification packet	12
6.5.1	Notification packet definition	12
6.5.2	Notification packet data exchange requirements	13
6.5.3	Notification packet contents	13
6.5.4	Notification packet capability requirements	13
7	Dialogues	13
7.1	Sending notifications	13
7.2	Clear notification channel queue	13
8	Security vulnerabilities	13

Annex A (normative) Management information base (MIB)	15
Annex B (normative) Requirements traceability matrix (RTM)	25
Bibliography	28
