Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Definition of PAPS types and requirements **2**
4.1 PAPS types 2
4.2 Basic system functionality 3
4.2.1 Type 1 — System supervised by a conventional driver located in the driver's seat 3
4.2.2 Type 2 — System supervised by a remote driver 4
4.3 General requirements 5
4.3.1 Maximum speed during operation 5
4.3.2 PAPS termination conditions 5
4.3.3 User's manual 5

5 Functional and performance requirements for PAPS **6**
5.1 Supported parking types 6
5.1.1 Parking types 6
5.1.2 Parallel parking space 6
5.1.3 Parallel parking slot 7
5.1.4 Perpendicular parking space 8
5.1.5 Perpendicular parking slot 9
5.1.6 Garage parking space 10
5.2 Operating states and user interface 12
5.2.1 Parking manoeuvre 12
5.2.2 Leaving manoeuvre for Type 2 15
5.3 Information strategy 16
5.3.1 General 16
5.3.2 Information in "Search state" 17
5.3.3 Information during "Found state" until "Waiting for authorization state" 17
5.3.4 Information in "Waiting for authorization state" 17
5.3.5 Information during "Parking/Leaving manoeuvre state" 17

6 Performance test requirements **17**
6.1 General 17
6.2 Environmental conditions 17
6.3 Test object 18
6.3.1 Bordering vehicle 18
6.3.2 Limiting objects 18
6.3.3 Reference curb 18
6.3.4 Slot lines 19
6.4 Test criteria 19
6.5 Performance test 20
6.5.1 Parallel parking space 20
6.5.2 Parallel parking slots 22
6.5.3 Perpendicular parking space 23
6.5.4 Perpendicular parking slot 25
6.5.5 Garage parking space 27

Bibliography **29**
