

ISO 4273:2024-01 (E)

Intelligent transport systems - Automated braking during low-speed manoeuvring (ABLS) - Requirements and test procedures

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Basic system functionality		3
4.1 Operating conditions		3
4.2 Classification of ABLS		4
4.2.1 ABLS types		4
4.2.2 Performance classification		4
4.2.3 ABLS classification overview		5
4.3 Principle of operation		5
4.3.1 General		5
4.3.2 Object detection		6
4.3.3 Situation evaluation		6
4.3.4 Braking activation		6
4.4 Information to the driver		6
5 Function and performance requirements for ABLS		6
5.1 General		6
5.2 Situations addressed		6
5.3 Perception requirements		7
5.4 Vehicle motion control requirements		7
5.5 Function flow		7
6 Performance test requirements		8
6.1 General		8
6.2 Environmental conditions		8
6.3 Boundary of parking space		9
6.4 Test object		9
6.5 General test criteria		9
6.6 Test procedure and criteria		9
6.6.1 Overview		9
6.6.2 Performance test for type A		9
6.6.3 Performance test for type B		15
6.6.4 Performance test for type C		16
Annex A (informative) Recommended preparation procedure for curve driving		22
Bibliography		23
