## Intelligent transport systems - Extracting trip data using nomadic and mobile devices for estimating CO<sub>2</sub> emissions - Part 2: Information provision for eco-friendly driving behaviour

---

<b>Contents</b>		Page
<b>Foreword</b>		iv
<b>Introduction</b>		v
<b>1 Scope</b>		1
<b>2 Normative references</b>		1
<b>3 Terms, definitions and abbreviated terms</b>		1
3.1 Terms and definitions		1
3.2 Abbreviated terms		2
<b>4 General information</b>		2
4.1 Purpose of information provision for eco-friendly driving behaviour		2
4.2 Overview of use cases		3
4.3 Functional requirement		3
<b>5 Use cases definitions</b>		3
5.1 Overview		3
5.2 UC 1: Speeding		3
5.3 UC 2: Long speeding		4
5.4 UC 3: Sudden acceleration		5
5.5 UC 4: Sudden start		5
5.6 UC 5: Sudden deceleration		6
5.7 UC 6: Sudden stop		7
5.8 UC 7: Idling		7
5.9 UC 8: Fuel-cut		8
5.10 UC 9: Economical driving		9
<b>6 Datasets definitions</b>		10
6.1 Overview		10
6.2 Data type		10
6.3 Datasets definitions in use cases		10
6.3.1 UC 1: Speeding		10
6.3.2 UC 2: Long speeding		10
6.3.3 UC 3: Sudden acceleration		11
6.3.4 UC 4: Sudden start		11
6.3.5 UC 5: Sudden deceleration		12
6.3.6 UC 6: Sudden stop		12
6.3.7 UC 7: Idling		13
6.3.8 UC 8: Fuel-cut		13
6.3.9 UC 9: Economical driving		14
