ISO/TS 15638-26:2024-10 (E)

Intelligent transport systems - Framework for cooperative telematics applications for regulated vehicles (TARV) - Part 26: Electric vehicle dynamic charging monitoring

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Symbols and abbreviated terms 2

5 General overview and framework 2

6 Basic conceptual operational requirement 5
6.1 General 5
6.2 Basic requirement 6

7 Requirements for services using generic vehicle data 7
7.1 General 7
7.1.1 Introduction 7
7.1.2 Unregulated application services using only generic basic vehicle data 7
7.1.3 Unregulated application services using both generic vehicle data and additional application-specific data 7
7.2 Conveyance identifiers 7

8 Concept of operations for unregulated application services with additional data requirements including roadside sensors 8
8.1 General 8
8.2 Statement of the goals and objectives of the system 8
8.3 Strategies, tactics, policies and constraints affecting the system 8
8.4 Organizations, activities, and interactions among participants and stakeholders 9
8.5 Operational roles and processes for the system 9
8.5.1 Common role of the prime service provider 9
8.5.2 Common role of the application service provider 10
8.5.3 Role of the application service 10
8.5.4 Service requirements definition 10
8.5.5 Common role of the user 10
8.5.6 Role of driver 11
8.5.7 Role of operator 11
8.5.8 Framework for operation 11
8.5.9 ROAM app library and data pantry 12

9 Sequence of operations for identified unregulated application services with additional data requirements 12
9.1 General sequence of operations 12
9.1.1 Overview 12
9.1.2 Data transactions 13
9.1.3 CREATE and GET core data 14
9.2 Quality of service requirements 16
9.3 Test requirements 17
9.4 Marking, labelling, and packaging 17

10 Common features of unregulated TARV application services 17
10.1 Generic operational processes for the system 17
10.2 Common characteristics for instantiations of unregulated application services 19
10.3 Common sequence of operations for unregulated application services 20

10.4 Quality of service 20
10.5 Information security 20
10.6 Data naming content and quality 20
10.7 Software engineering quality systems 21
10.8 Quality monitoring station 21
10.9 Audits 21
10.10 Data access control policy 21
10.11 Approval of IVSs and service provider 21
10.12 Approval of roadside sensors 21
Annex A (informative) **Application examples** **22**
Bibliography **24**
