

ISO/TS 8231:2025-09 (E)

Road vehicles - Visibility - Requirements and recommendations for automotive interior display systems

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
3.1	Vehicle related terms	2
3.2	Device-related terms	3
3.3	Location-related terms	4
3.4	Optical- and display-related terms	5
3.5	Material-related terms	6
3.6	Coating-related terms	7
3.7	Test-related terms	8
4	1Considerations for the requirements of the display system	8
4.1	General	8
4.2	Readability requirements	8
4.2.1	General	8
4.2.2	Readability	8
4.2.3	Visual comfort	8
4.2.4	Screen luminance	9
4.2.5	Screen luminance auto adjustment and flickering	9
4.2.6	Display response time	9
4.2.7	Glasses and sunglasses	9
4.2.8	Viewing area	9
4.2.9	Viewing angle	9
4.2.10	Two-dimensional (2D) and three-dimensional (3D) displays	9
4.3	Display and screen requirements	10
4.3.1	Cover lens	10
4.3.2	Luminance	10
4.3.3	Contrast	10
4.3.4	Ghosting	11
4.3.5	Black mura	11
4.3.6	Glare	12
4.3.7	Sparkle	12
4.3.8	Reflection and reflectance	12
4.3.9	Colour and its attributes	14
4.3.10	Gamma	14
4.3.11	Haze	14
4.4	Environmental impact on interior displays	15
4.4.1	General	15
4.4.2	Illumination	15
4.4.3	Automatic and adaptive display brightness	15
4.4.4	Temperature range	15
4.4.5	Humidity	16
4.5	Misuse resistance considerations	16
4.5.1	General	16
4.5.2	Scratches and dents	16

4.5.3	Severe push- and pull loads	16
4.5.4	Spilled liquids, lotions, and creams	17
4.5.5	Reset	17
5	Specific considerations for cover lenses	17
5.1	General	17
5.2	Coatings of cover lenses	17
5.2.1	Anti-glare (AG)	18
5.2.2	Anti-reflection (AR)	18
5.2.3	Easy-to-clean coating (ETCC)	18
5.2.4	Anti-fingerprint coating (AFC)	18
5.3	Breakage and fragility	18
6	Reliability and durability requirements	18
6.1	General	18
6.2	Vibrations and mechanical shock	19
6.3	Scratch resistance	19
6.4	Abrasion resistance	19
6.5	Severe push- and pull loads	19
6.6	Temperature and humidity testing	19
6.6.1	General	19
6.6.2	Temperature endurance testing	20
6.6.3	Temperature cycling testing	20
6.6.4	Humidity testing	20
6.6.5	Damp heat testing	20
6.7	UV Light and weathering testing	20
6.8	Chemical substance resistance	20
6.8.1	General	20
6.8.2	Cleaning solutions	20
6.8.3	Sanitizing and disinfectants	20
6.9	Breakability tests of displays	21
7	Behaviour in accidents	21
7.1	Head impact test (HIT)	21
Annex A (informative) Colour measurements		22
Annex B (Informative) Test methods for coatings on cover lenses		31
Bibliography		33
