Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Overview 1

4 Ring types and designation examples 2
4.1 Type T -- Straight faced keystone ring 6° 2
4.2 Type TB -- Symmetrical barrel faced keystone ring 6° 4
4.3 Type TBA -- Asymmetrical barrel faced keystone ring 6° 6
4.4 Type TM -- Taper faced keystone ring 6° 8
4.5 Type K -- Straight faced keystone ring 15° 9
4.6 Type KB -- Symmetrical barrel faced keystone ring 15° 10
4.7 Type KBA -- Asymmetrical barrel faced keystone ring 15° 11
4.8 Type KM -- Taper faced keystone ring 15° 12

5 Common features 13
5.1 Type T, TB, TBA, TM, K, KB, KBA, KM rings -- Outside and inside rounded edges 13
5.2 Type T, TB, TBA, TM, K, KB, KBA, KM rings (positive twist type) -- Internal bevel top side 13
5.3 Type TM or KM rings with partly cylindrical machined (LM) or lapped (LP) peripheral surface 14
5.4 Type T, TB, TBA, TM, K, KB, KBA, KM rings -- Plating or coating configuration 14

6 Force Factors 17
