

ISO/TR 10305-1:2003-02 (E)

Road vehicles - Calibration of electromagnetic field strength measuring devices - Part 1: Devices for measurement of electromagnetic fields at frequencies > 0 Hz

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Terms and definitions	1
3	Layout and properties of field strength measuring devices	2
3.1	Layout and functional principles	2
3.2	Properties	3
3.3	Response characteristics	4
4	General requirements for calibration procedures	4
5	Calibration procedures	6
5.1	Plate capacitor arrangement	6
5.2	Coil arrangements	10
5.3	TEM cells	14
5.4	GTEM cells	17
5.5	Antennas in absorber-lined shielded enclosures	19
6	Test and calibration reports	24
Annex A (informative) Physical considerations on coils and antennas		26
Annex B (informative) Example description of calibration procedure		34
Bibliography		35
