Traffic and Traveller Information (TTI) — TTI messages via traffic message coding —
Part 1: Coding protocol for Radio Data System — Traffic Message Channel (RDS-TMC) using ALERT-C

CONTENTS

Foreword.....	v
INTRODUCTION	vi
1 SCOPE	1
1.1 General Scope	1
1.2 Content.....	1
1.3 Message Management.....	2
1.4 Transmission.....	2
1.5 Event List.....	2
2 NORMATIVE REFERENCES.....	2
3 Terms and definitions and abbreviated terms.....	3
3.1 Terms and definitions.....	3
3.2 Abbreviated terms	5
4 APPLICATION.....	6
4.1 General.....	6
4.2 Definition of the TMC "travel service"	6
4.3 TMC virtual terminal	7
4.4 Event-orientated end-user information messages	7
4.5 Strategic and tactical information	7
4.6 Geographic relevance	7
4.7 Transmitted message priority	8
4.8 Event List.....	8
4.9 Future extensions.....	9
5 PRESENTATION.....	9
5.1 General.....	9
5.2 TMC virtual language	9
5.3 Message content.....	9
5.4 Implicit information	14
5.5 Optional message content.....	15
6 MESSAGE MANAGEMENT.....	19
6.1 General.....	19
6.2 System messages.....	20
6.3 Message repetition	21
6.4 Message updating	21
6.5 Message deletion	22
6.6 Message presentation	24
6.7 Out of area referencing	24
7 TRANSMISSION	25
7.1 General.....	25
7.2 Format of type 8A groups.....	25
7.3 Immediate repetition.....	26
7.4 Single-group user messages.....	26
7.5 System messages.....	27
7.6 Multi-group messages.....	34
7.7 Summary of X-bit usage in RDS-TMC type 8A groups	37
