ISO 6621-4:2003-10 (E)

Internal combustion engines - Piston rings - Part 4: General specifications

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Piston ring codes 1

5 Designation of piston rings 4
5.1 Designation elements and order 4
5.2 Designation examples 5

6 Marking of piston rings 6
6.1 General 6
6.2 Mandatory top-side marking 7
6.3 Additional marking 7

7 General characteristics 7
7.1 Ring shape 7
7.2 Light tightness 8
7.3 Closed gap 8
7.4 Tangential force, Ft, and diametral force, Fd, of single piece piston rings 8

8 Notches for preventing ring rotation 14

9 Machining of surfaces 16
9.1 Peripheral surfaces 16
9.2 Side faces 16
9.3 Other surfaces 16

10 Plated, coated and treated surfaces 18
10.1 Chromium plating on peripheral surfaces 18
10.2 Spray-coated peripheral surfaces 21
10.3 Nitrided surfaces 24
10.4 Treated surfaces 26

11 Miscellaneous 26
11.1 Cleanliness 26
11.2 Corrosion protection 26
11.3 Packaging 27
