ISO/TS 15827:2007-02 (E)

Road vehicles - Test procedures - Evaluating small female dummy arm and forearm interactions with driver frontal airbags and side airbags

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Test devices 2
4.1 Hybrid III small female dummy 2
4.2 SID-IIs small adult/adolescent side impact dummy 2
4.3 SAE small female instrumented arm and the enhanced airbag interaction arm 3

5 Instrumentation 3
5.1 Hybrid III small female dummy 3
5.2 SID-IIs small adult/adolescent side impact dummy 3
5.3 SAE small female instrumented arm 3
5.4 Impact response measurements 3
5.5 Dummy injury criteria 3

6 Condition of the test vehicle 5
6.1 General conditions 5
6.2 Seat adjustment 6
6.3 Steering wheel adjustment 6
6.4 Pedal adjustment 6
6.5 Dummy test temperature 6
6.6 Electrical grounding 6

7 Test configurations 6
7.1 Driver frontal airbag tests 6
7.2 Side airbag static deployment tests 8

8 Test procedure 9
