Ships and marine technology - Risk assessment on anti-fouling systems on ships - Part 2: Marine environmental risk assessment method for anti-fouling systems on ships using biocidally active substances

Contents

Page

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Application	2
4.1 General	2
4.2 Application considerations	2
4.3 Structure and procedure of environmental risk assessment	3
5 Review of the risk of a biocidally active substance when used in the anti-fouling system ...	3
5.1 General	3
5.2 Assessment when a biocidally active substance is tentatively deemed to have "relatively low risk"	4
5.3 Assessment when a certain type of marine environment is considered to be a recipient of biocidally active substances	4
6 Exposure assessment	4
6.1 Preparing the emission scenario	4
6.2 Determination of the PEC	6
7 Selection of the appropriate PNEC	7
8 Risk characterization	7
9 Risk assessment of similar anti-fouling systems	7
10 Substances of concern	7
11 Risk assessment report	7
Annex A (normative) Minimum information required for a risk assessment report	8
Bibliography	10
