Ships and marine technology - Risk assessment on anti-fouling systems on ships - Part 2: Marine environmental risk assessment method for anti-fouling systems on ships using biocidally active substances

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Application	2
4.1	General	2
4.2	Application considerations	2
4.3	Structure and procedure of environmental risk assessment	3
5	Review of the risk of a biocidally active substance when used in the anti-fouling system ...	3
5.1	General	3
5.2	Assessment when a biocidally active substance is tentatively deemed to have "relatively low risk"	4
5.3	Assessment when a certain type of marine environment is considered to be a recipient of biocidally active substances	4
6	Exposure assessment	4
6.1	Preparing the emission scenario	4
6.2	Determination of the PEC	6
7	Selection of the appropriate PNEC	7
8	Risk characterization	7
9	Risk assessment of similar anti-fouling systems	7
10	Substances of concern	7
11	Risk assessment report	7
Annex A (normative) Minimum information required for a risk assessment report		8
