## Paints and varnishes - Corrosion protection of steel structures by protective paint systems - Part 7: Execution and supervision of paint work

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Preconditions for the execution of the paint work .....	2
4.1	Qualification .....	2
4.2	Condition of the substrate .....	2
4.3	Health and safety and environmental protection .....	2
5	Coating materials .....	3
5.1	Supply .....	3
5.2	Storage .....	3
6	Execution of paint work .....	3
6.1	General .....	3
6.2	Application conditions .....	4
6.3	Application methods .....	5
6.3.1	Brush application .....	5
6.3.2	Roller application .....	5
6.3.3	Spray application .....	5
6.3.4	Other application methods .....	5
6.4	Evaluation before work commences .....	5
7	Supervision of the paint work .....	5
7.1	General .....	5
7.2	Measurement and test instruments .....	6
7.3	Assessments of the coating .....	6
8	Reference areas and reference specimens .....	7
8.1	General .....	7
8.2	Previously coated surfaces .....	7
8.2.1	General .....	7
8.2.2	Type A reference area .....	7
8.2.3	Type B reference area .....	7
8.3	Reference area records .....	7
8.4	Assessment of coating .....	7
Annex A (informative)	Number of reference areas .....	9
Bibliography .....		10
