DIN EN ISO 16014-5:2019-09 (E)

Plastics - Determination of average molecular weight and molecular weight distribution of polymers using size-exclusion chromatography - Part 5: Light-scattering method (ISO 16014-5:2019)

Contents

Page

11 Expression of results 15
11.1 Calibration curve 15
11.1.1 General 15
11.1.2 Method A 15
11.1.3 Method B 15
11.2 Calculation of average molecular weight 17
11.3 Differential molecular weight distribution curve 17
11.4 Cumulative molecular weight distribution curve 17

12 Precision 18

13 Test report 18
13.1 General 18
13.2 Apparatus and measurement parameters 18
13.3 Calibration of the system 18
13.4 Calibration curve 19
13.5 Results 19

Annex A (informative) Interlaboratory test 20

A.1 General 20
A.2 Experimental conditions 20
A.3 Results of interlaboratory test 20

Annex B (informative) Information on light scattering 22

B.1 Principle of light scattering 22
B.2 Rayleigh ratio of solvents 23
B.3 Refractive index increment, dn/dc 23
B.4 Relation between radius of gyration Rg and molecular weight M 24
B.5 Refractive index of solvents 24
B.6 Effect of the second virial coefficient A2 on molecular weight 25

Annex C (informative) Calibration curve in low molecular weight range 26
