ISO/TR 22770:2019-07 (E)

Preparation of steel substrates before application of paints and related products - Analytical colorimetry method to support visual assessment of surface preparation grades

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols 2

5 Principle 2

6 Recommendations for instruments 3
6.1 Instrument handling 3
6.2 Instrument specifications 3
6.2.1 Illuminant and observer 3
6.2.2 Illuminating and viewing conditions 3
6.2.3 Tolerance of the instrument 4

7 Supporting data 4
7.1 General 4
7.2 Sample preparation 4
7.3 Results 4

8 Examples of application 5
8.1 General 5
8.2 Steel pipes producer for oil and gas industry 5
8.2.1 Application: control quality of blasting operation prior to anticorrosion coating. 5 8.2.2 Reference substrate 6
8.2.3 Quality control 6
8.3 Cast iron foundry 6
8.3.1 Application: control quality of desanding operation of cast iron automotive parts 6
8.3.2 Reference substrate 6
8.3.3 Quality control 6
8.4 Trailers manufacturer 6
8.4.1 Application: control quality of blasting operation prior to painting 6
8.4.2 Reference substrate 6
8.4.3 Quality control 7
8.5 Production of freight wagons 7
8.5.1 Application: control quality of blasting operation prior to anticorrosion coating. 7 8.5.2 Reference substrate 7
8.5.3 Quality control 7
8.6 Cold drawn bars producer 7
8.6.1 Application: optimisation of descaling operation 7
8.6.2 Reference substrate 7
8.6.3 Quality control 7

Annex A (informative) Methodology **8**
