

ISO/TR 22770:2019-07 (E)

Preparation of steel substrates before application of paints and related products - Analytical colorimetry method to support visual assessment of surface preparation grades

Contents

	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols	2
5 Principle	2
6 Recommendations for instruments	3
6.1 Instrument handling	3
6.2 Instrument specifications	3
6.2.1 Illuminant and observer	3
6.2.2 Illuminating and viewing conditions	3
6.2.3 Tolerance of the instrument	4
7 Supporting data	4
7.1 General	4
7.2 Sample preparation	4
7.3 Results	4
8 Examples of application	5
8.1 General	5
8.2 Steel pipes producer for oil and gas industry	5
8.2.1 Application: control quality of blasting operation prior to anticorrosion coating. 5 8.2.2 Reference substrate	6
8.2.3 Quality control	6
8.3 Cast iron foundry	6
8.3.1 Application: control quality of desanding operation of cast iron automotive parts	6
8.3.2 Reference substrate	6
8.3.3 Quality control	6
8.4 Trailers manufacturer	6
8.4.1 Application: control quality of blasting operation prior to painting	6
8.4.2 Reference substrate	6
8.4.3 Quality control	7
8.5 Production of freight wagons	7
8.5.1 Application: control quality of blasting operation prior to anticorrosion coating. 7 8.5.2 Reference substrate	7
8.5.3 Quality control	7
8.6 Cold drawn bars producer	7
8.6.1 Application: optimisation of descaling operation	7
8.6.2 Reference substrate	7
8.6.3 Quality control	7

Annex A (informative) Methodology	8
