ISO 3233-2:2019 (E)

Paints and varnishes — Determination of the percentage volume of non-volatile matter — Part 2: Method using the determination of non-volatile-matter content in accordance with ISO 3251 and determination of dry film density on coated test panels by the Archimedes' principle

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Apparatus

6 Sampling

7 Procedure

- 7.1 Number of determinations and preparation
- 7.2 Determination of the practical dry-film density
- 7.2.1 Determination of the mass of the uncoated plate in air and in the immersion liquid
- 7.2.2 Weighing the coating material and determination of the mass of the plate with coating material
- 7.3 Determination of the density
- 7.4 Determination of the non-volatile-matter content
- 7.5 Determination of film thickness

8 Evaluation

- 8.1 Calculation of the practical dry-film density
- 8.2 Calculation of the non-volatile matter by volume using the practical dry-film density
- 8.3 Determination of the practical spreading rate

9 Precision

- 9.1 Repeatability
- 9.2 Reproducibility

10 Test report

Annex A (informative) Overview of existing methods for determination of non-volatile matter content and volume of non-volatile matter
