## Paints and varnishes - Coating systems for wind-turbine rotor blades - Part 5: Measurement of transmittance properties of UV protective coatings

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Principle .....	2
5	Apparatus and materials .....	2
5.1	Film applicator for coating material .....	2
5.2	Substrate for free coating film preparation .....	2
5.2.1	Preparation of free film and test specimen .....	2
5.2.2	Coating application .....	3
5.3	Film thickness measurement .....	3
5.4	UV/VIS spectrophotometer .....	3
5.5	Long pass specification for check .....	4
6	Test procedure .....	4
6.1	Test procedure with spectrophotometer .....	4
6.2	Check of spectrophotometer with long pass filter .....	5
6.3	Spectral transmittance of the specimen (film) .....	6
6.4	Calculation of transmittance .....	6
7	Precision .....	6
8	Test report .....	6
Annex A (normative) Check of the spectral transmittance of the long pass filter .....		8
Annex B (informative) Application and evaluation references .....		9
Bibliography .....		11
