Foreword iv

Introduction v

1 Scope 1

2 Conclusions 1

3 Terms and definitions 2

4 Sequential collection of data 2

5 Protocol for assessing surface contamination 5

6 Recommended test protocol to investigate the influence of salt contamination on coating service life 5

7 Other standards of interest 5

Annex A (informative) Summary of data from bibliographic references 6

Annex B (informative) Data from a paint manufacturer 14

Annex C (informative) Coating-system manufacturers' recommendations regarding toleration of salt contamination on a steel surface before application of paints or related products 16

Annex D (informative) Data supplied by Japan (see 4.2) 19

Annex E (informative) Assessment of soluble chloride and/or sulfate contamination on a steel surface -- Surface inspection protocol 21

Annex F (informative) Recommended test procedure when investigating the influence of soluble chloride and/or sulfate contamination on coating service life 22

Bibliography 23
