## Preparation of steel substrates before application of paints and related products - Collected information on the effect of levels of water-soluble salt contamination

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 <b>Scope</b> .....		1
2 <b>Conclusions</b> .....		1
3 <b>Terms and definitions</b> .....		2
4 <b>Sequential collection of data</b> .....		2
5 <b>Protocol for assessing surface contamination</b> .....		5
6 <b>Recommended test protocol to investigate the influence of salt contamination on coating service life</b> .....		5
7 <b>Other standards of interest</b> .....		5
<b>Annex A (informative) Summary of data from bibliographic references</b> .....		6
<b>Annex B (informative) Data from a paint manufacturer</b> .....		14
<b>Annex C (informative) Coating-system manufacturers' recommendations regarding toleration of salt contamination on a steel surface before application of paints or related products</b> .....		16
<b>Annex D (informative) Data supplied by Japan (see 4.2)</b> .....		19
<b>Annex E (informative) Assessment of soluble chloride and/or sulfate contamination on a steel surface -- Surface inspection protocol</b> .....		21
<b>Annex F (informative) Recommended test procedure when investigating the influence of soluble chloride and/or sulfate contamination on coating service life</b> .....		22
<b>Bibliography</b> .....		23
