## Glass in building - Explosion-resistant security glazing - Test and classification by shock-tube loading

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 <b>Scope</b> .....		1
2 <b>Normative references</b> .....		1
3 <b>Terms and definitions</b> .....		2
4 <b>Classification and hazard rating</b> .....		4
5 <b>Test specimens</b> .....		4
6 <b>Apparatus and equipment preparation</b> .....		5
7 <b>Test procedure and requirements</b> .....		7
8 <b>Performance requirements</b> .....		9
9 <b>Classification of explosion-resistant glazing</b> .....		11
10 <b>Test report and test-report summary</b> .....		13
11 <b>Precision and bias</b> .....		15
<b>Annex A (normative) Blast parameters and derivation</b> .....		16
<b>Annex B (informative) Blast shock-wave characteristics</b> .....		18
<b>Annex C (informative) Equivalent threat levels</b> .....		19
<b>Annex D (informative) Fragment definitions and criteria comparisons with other standards</b> .....		20
<b>Bibliography</b> .....		21
