DIN EN 13036-6:2008-06 (E)

Road and airfield surface characteristics - Test methods - Part 6: Measurement of transverse and l ongitudinal profiles in the evenness and megatexture wavelength ranges

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Terms and definitions 5

3 Equipment performance classification 7
3.1 General 7
3.2 Travelled distance accuracy of longitudinal and/or transverse profiling 8
3.3 Vertical sensor resolution of longitudinal profiling 8
3.4 Acquisition sampling interval of longitudinal profiling 8
3.5 Reporting sampling interval of longitudinal profiling 9
3.6 Large wavelength cut-off (-3dB) of longitudinal profiling 9
3.7 Vertical resolution of transverse profiling 9
3.8 Acquisition sampling interval of transverse profiling 9
3.9 Acquisition repetition interval of transverse profiling 9
3.10 Reporting repetition interval of transverse profiling 9
3.11 Transverse gradient measurement accuracy of transverse profiling 9

4 Procedures of measurement 10
4.1 Methods for measurement of profiles 10
4.2 Operational guidelines 10
4.3 Field testing 11
4.4 Equipment maintenance and repair 13

5 Report 14
5.1 Calibration report 14
5.2 Survey report 14

6 Safety 15
