

DIN EN 13036-6:2008-06 (E)

Road and airfield surface characteristics - Test methods - Part 6: Measurement of transverse and longitudinal profiles in the evenness and megatexture wavelength ranges

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Terms and definitions	5
3	Equipment performance classification	7
3.1	General	7
3.2	Travelled distance accuracy of longitudinal and/or transverse profiling	8
3.3	Vertical sensor resolution of longitudinal profiling	8
3.4	Acquisition sampling interval of longitudinal profiling	8
3.5	Reporting sampling interval of longitudinal profiling	9
3.6	Large wavelength cut-off (-3dB) of longitudinal profiling	9
3.7	Vertical resolution of transverse profiling	9
3.8	Acquisition sampling interval of transverse profiling	9
3.9	Acquisition repetition interval of transverse profiling	9
3.10	Reporting repetition interval of transverse profiling	9
3.11	Transverse gradient measurement accuracy of transverse profiling	9
4	Procedures of measurement	10
4.1	Methods for measurement of profiles	10
4.2	Operational guidelines	10
4.3	Field testing	11
4.4	Equipment maintenance and repair	13
5	Report	14
5.1	Calibration report	14
5.2	Survey report	14
6	Safety	15
