ISO 21650:2007-10 (E)

Actions from waves and currents on coastal structures

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Terms and definitions 2

3 Symbols 9

4 Basic variables for actions from waves and currents 9
4.1 Water levels 9
4.2 Waves 10
4.3 Currents 13

5 Wave and current action on structures 13
5.1 Wave action on mound breakwaters 13
5.2 Wave action on vertical and composite breakwaters 16
5.3 Wave actions on coastal dykes and seawalls 17
5.4 Wave and current action on cylindrical members and isolated cylindrical structures 20
5.5 Wave interaction with floating breakwaters 21
5.6 Wave action on wave screens 22

6 Probabilistic analysis of performance of structures exposed to action from waves and currents 23
6.1 Examination of uncertainties related to wave and current action 23
6.2 Reliability assessment of structures 24

Annex A (informative) Water levels 25

Annex B (informative) Wave action parameters 27

Annex C (informative) Currents 41

Annex D (informative) Wave action on rubble mound structures 43

Annex E (informative) Wave actions on vertical and composite breakwaters 63

Annex F (informative) Wave action on coastal dykes and seawalls 68

Annex G (informative) Wave and current actions on cylindrical members and isolated structures 76

Annex H (informative) Wave interaction with floating breakwaters 93

Annex I (informative) Wave action on wave screens 97

Annex J (informative) Probabilistic analysis of performance of structures exposed to action from waves and currents 102
