

ISO 21650:2007-10 (E)

Actions from waves and currents on coastal structures

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Terms and definitions	2
3	Symbols	9
4	Basic variables for actions from waves and currents	9
4.1	Water levels	9
4.2	Waves	10
4.3	Currents	13
5	Wave and current action on structures	13
5.1	Wave action on mound breakwaters	13
5.2	Wave action on vertical and composite breakwaters	16
5.3	Wave actions on coastal dykes and seawalls	17
5.4	Wave and current action on cylindrical members and isolated cylindrical structures	20
5.5	Wave interaction with floating breakwaters	21
5.6	Wave action on wave screens	22
6	Probabilistic analysis of performance of structures exposed to action from waves and currents	23
6.1	Examination of uncertainties related to wave and current action	23
6.2	Reliability assessment of structures	24
	Annex A (informative) Water levels	25
	Annex B (informative) Wave action parameters	27
	Annex C (informative) Currents	41
	Annex D (informative) Wave action on rubble mound structures	43
	Annex E (informative) Wave actions on vertical and composite breakwaters	63
	Annex F (informative) Wave action on coastal dykes and seawalls	68
	Annex G (informative) Wave and current actions on cylindrical members and isolated structures	76
	Annex H (informative) Wave interaction with floating breakwaters	93
	Annex I (informative) Wave action on wave screens	97
	Annex J (informative) Probabilistic analysis of performance of structures exposed to action from waves and currents	102
