ISO 22111:2007-11 (E)

Bases for design of structures - General requirements

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols 5

5 Application 7

6 Basic requirements for structural performance 7

7 Classification of structures and elements of structures 7

8 Actions 8
8.1 General 8
8.2 Evaluation of values of actions 8
8.3 Permanent actions 8
8.4 Variable actions 8
8.5 Accidental actions 9

9 Combinations of actions 9
9.1 General 9
9.2 Ultimate limit states 9
9.2.1 Strength 9
9.2.2 Static equilibrium 10
9.3 Serviceability limit states 10
9.4 Formats for presentation of design values for leading and accompanying actions 10

10 Analysis and testing 11
10.1 Analysis 11
10.2 Testing 11

11 Demonstrating compliance with requirements 11
11.1 General 11
11.2 Ultimate limit state 12
11.2.1 Strength 12
11.2.2 Static equilibrium 12
11.3 Robustness 12
11.4 Serviceability 13
11.5 Durability 13

Annex A (informative) Guidance for adopting groups 14

Annex B (informative) Formats for presentation of design values for use in combinations of actions 17

Annex C (informative) Calibration of design values 21

Annex D (informative) Design procedure 22

Bibliography 23
