

# DIN 1045-2:2008-08 (E)

## Concrete, reinforced and prestressed concrete structures - Part 2: Concrete - Specification, performance, production and conformity - Application rules for DIN EN 206-1

---

<b>Contents</b>		<b>Page</b>
Foreword .....		5
<b>1</b>	<b>Scope .....</b>	<b>8</b>
<b>2</b>	<b>Normative references .....</b>	<b>8</b>
<b>3</b>	<b>Definitions, symbols and abbreviations .....</b>	<b>11</b>
3.1	Terms and definitions .....	11
3.2	Symbols and abbreviations .....	13
<b>4</b>	<b>Classification .....</b>	<b>13</b>
4.1	Exposure classes related to environmental actions .....	13
4.2	Fresh concrete .....	17
4.2.1	Consistence classes .....	17
4.2.2	Classes related to maximum particle size .....	18
<b>5</b>	<b>Requirements for concrete and methods of verification .....</b>	<b>18</b>
5.1	Basic requirements for constituent materials .....	18
5.1.1	General .....	18
5.1.2	Cement .....	18
5.1.3	Aggregates .....	18
5.1.4	Mixing water .....	18
5.1.5	Admixtures .....	18
5.1.6	Additions (including mineral fillers and pigments) .....	19
5.1.7	Fibres .....	19
5.2	Basic requirements for composition of concrete .....	19
5.2.1	General .....	19
5.2.3	Use of aggregates .....	20
5.2.4	Use of recycled water .....	23
5.2.5	Use of additions .....	23
5.2.6	Use of admixtures .....	27
5.2.7	Chloride content .....	28
5.2.8	Concrete temperature .....	29
5.2.9	Use of fibres .....	29
5.3	Requirements related to exposure classes .....	30
5.3.2	Limiting values for concrete composition .....	30
5.3.3	Performance-related design methods .....	31
5.3.4	Requirements for underwater concrete .....	31
5.3.5	Concrete exposed to water-contaminating substances .....	31
5.3.6	Concrete exposed to high service temperatures .....	32
5.3.7	High-strength concrete .....	32
5.3.8	Cement mortar for jointing and pointing .....	32
5.4	Requirements for fresh concrete .....	32
5.4.1	Consistence .....	32
5.4.2	Cement content and water/cement ratio .....	33
5.4.3	Air content .....	33
5.5	Requirements for hardened concrete .....	33
5.5.1	Strength .....	33
5.5.3	Resistance to water penetration .....	34

5.5.5	Wear resistance .....	34
6	Specification of concrete .....	34
6.1	General .....	34
6.2	Specification for designed concrete .....	35
6.2.2	Basic requirements .....	35
6.2.3	Additional requirements .....	35
6.3	Specification for prescribed concrete .....	35
6.3.2	Basic requirements .....	35
6.4	Specification of standardized prescribed concrete .....	35
7	Delivery of fresh concrete .....	35
7.1	Information from the user of the concrete to the producer .....	35
7.2	Information from the producer of the concrete to the user .....	36
7.3	Delivery ticket for ready-mixed concrete .....	36
7.5	Consistence at delivery .....	37
7.6	Transport of concrete to the site .....	37
8	Conformity control and conformity criteria .....	38
8.2	Conformity control for designed concrete .....	38
8.2.1	Conformity control for compressive strength .....	38
8.2.2	Conformity control for tensile splitting strength .....	39
8.3	Conformity control of prescribed concrete including standardized prescribed concrete ..	39
8.4	Actions in the case of non-conformity of the product .....	39
9	Production control .....	40
9.1	General .....	40
9.3	Recorded data and other documents .....	40
9.5	Concrete composition and initial testing .....	40
9.6	Personnel, equipment and installation .....	41
9.6.1	Personnel .....	41
9.6.2	Equipment and installation .....	41
9.7	Batching of constituent materials .....	41
9.8	Mixing of concrete .....	41
9.9	Production control procedures .....	42
10	Evaluation of conformity .....	42
10.1	General .....	42
10.2	Assessment, surveillance and certification of production control .....	43
11	Designation for designed concrete .....	43
Annex B (normative) Identity testing for compressive strength .....		44
Annex C (normative) Provisions for assessment, surveillance and certification of production control .....		44
C.2	Tasks for the inspection body .....	44
C.2.1	Initial assessment of production control .....	44
C.3	Tasks for certification body .....	45
C.3.1	Certification of concrete .....	45
C.3.2	Measures in case of non-conformity .....	46
Annex D (informative) Bibliography .....		46
Annex E (informative) Guidance on the application of the equivalent performance concept of concrete properties .....		46
Annex F (normative) Recommendations for limiting values of concrete composition .....		47
Annex H (normative) Additional provisions for high-strength concrete .....		55

<b>Annex K (normative) Concrete families .....</b>	<b>57</b>
<b>Annex L (informative) Particle size analysis .....</b>	<b>57</b>
<b>Annex U (normative) Requirements for aggregates .....</b>	<b>60</b>
<b>Figures concrete construction, standards for design and workmanship, standards for constituent materials, and test standards .....</b>	<b>7</b>
<b>Figure L.1 -- Grading curves for 8 mm maximum particle size .....</b>	<b>58</b>
<b>Figure L.2 -- Grading curves for 16 mm maximum particle size .....</b>	<b>58</b>
<b>Figure L.3 -- Grading curves for 32 mm maximum particle size .....</b>	<b>59</b>
<b>Figure L.4 -- Grading curves for 63 mm maximum particle size .....</b>	<b>59</b>
<b>Tables Table 1 -- Exposure classes and moisture classes .....</b>	<b>14</b>
<b>Table 5 -- Compaction classes .....</b>	<b>17</b>
<b>Table 6 -- Flow classes .....</b>	<b>17</b>
<b>Table 10 -- Maximum chloride content of concrete .....</b>	<b>28</b>
<b>Table 22 -- Control of constituent materials (continued) .....</b>	<b>42</b>
<b>Table F.2.1 -- Limiting values for composition and properties of concrete (1) .....</b>	<b>48</b>
<b>Table F.2.2 -- Limiting values for composition and properties of concrete (2) .....</b>	<b>49</b>
<b>Table F.3.1 -- Ranges of application for cement as in DIN 1164-10, DIN 1164-12, DIN EN 197-1, and DIN EN 197-4, and FE type, CEM-I-SE type and CEM-II-SE type cements as in Table F.3.2 - - Ranges of application for CEM-II-M type cement as in DIN 1164-10, DIN 1164-12 and DIN EN 197-1, with three main constituents, and FE type and CEM-II SE type Table F.3.3 -- Ranges of application for CEM IV and CEM V type cements with two or three main constituents as in DIN 1164-10, DIN 1164-12 and DIN EN 197-1, and FE type Table F.3.4 -- Ranges of application for cement as in DIN EN 14216, used for preparation of Table F.4.1 -- Maximum permitted ultrafines content for concrete up to concrete strength classes C50/60 and LC50/55 and of exposure classes XF and XM, with a maximum particle size between 16 mm and 63 mm .....</b>	<b>54</b>
<b>Table F.4.2 -- Maximum permitted ultrafines content for concrete of concrete strength classes C55/67 and LC55/60 and of all exposure classes, with a maximum particle size between 16 mm and 63 mm .....</b>	<b>54</b>
<b>Table F.5 -- Minimum cement content for standardized prescribed concrete with cement of strength class 32,5 as specified in DIN EN 197-1 and with a maximum particle size of 32 mm .....</b>	<b>54</b>
<b>Table H.1 -- Additional control of constituent materials of high-strength concrete .....</b>	<b>55</b>
<b>Table H.2 -- Additional control of equipment for production of high-strength concrete .....</b>	<b>56</b>
<b>Table H.3 -- Additional control of production procedures and of properties of high-strength concrete .....</b>	<b>56</b>
<b>Table U.1 -- Standard requirements for aggregates as in DIN EN 12620 .....</b>	<b>60</b>
<b>Table U.2 -- Other requirements for aggregates as in DIN EN 12620 .....</b>	<b>61</b>
<b>Table U.3 -- Standard requirements for aggregates as in DIN EN 13055-1 .....</b>	<b>62</b>
<b>Table U.4 -- Other requirements for aggregates as in DIN EN 13055-1 .....</b>	<b>63</b>
