DIN EN 12812:2008-12 (E)

Falsework - Performance requirements and general design

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Design classes 7
4.1 General 7
4.2 Design class A 7
4.3 Design class B 7

5 Materials 8
5.1 General 8
5.2 Basic requirements for materials 8
5.3 Weldability 8

6 Brief 8

7 Design requirements 8
7.1 General 8
7.2 Thickness of material 9
7.3 Connections 9
7.4 Flexibility of prefabricated support towers 9
7.5 Foundation 10
7.6 Towers providing support 12

8 Actions 13
8.1 General 13
8.2 Direct actions 13
8.3 Indirect actions 17
8.4 Other actions "Q9" 17
8.5 Load combinations 17

9 Structural design for classes B1 and B2 18
9.1 Technical documentation 18
9.2 Structural design 20
9.3 Imperfections and boundary conditions 23
9.4 Calculation of internal forces 30
9.5 Characteristic values of resistance and friction values 37

Annex A (informative) Relation with site activities 40

Annex B (informative) 41
