

DIN EN 12812:2008-12 (E)

Falsework - Performance requirements and general design

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Design classes	7
4.1	General	7
4.2	Design class A	7
4.3	Design class B	7
5	Materials	8
5.1	General	8
5.2	Basic requirements for materials	8
5.3	Weldability	8
6	Brief	8
7	Design requirements	8
7.1	General	8
7.2	Thickness of material	9
7.3	Connections	9
7.4	Flexibility of prefabricated support towers	9
7.5	Foundation	10
7.6	Towers providing support	12
8	Actions	13
8.1	General	13
8.2	Direct actions	13
8.3	Indirect actions	17
8.4	Other actions "Q9"	17
8.5	Load combinations	17
9	Structural design for classes B1 and B2	18
9.1	Technical documentation	18
9.2	Structural design	20
9.3	Imperfections and boundary conditions	23
9.4	Calculation of internal forces	30
9.5	Characteristic values of resistance and friction values	37
Annex A (informative) Relation with site activities		40
Annex B (informative)		41
Bibliography		42
