ISO 13823:2008-06 (E)

General principles on the design of structures for durability

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols 4

5 Application 4

6 Basic concepts for verifying durability 5
6.1 General 5
6.2 Structure environment 5
6.3 Transfer mechanisms 5
6.4 Environmental action 5
6.5 Action effects 6
6.6 Limit states 6

7 Durability requirements 7
7.1 Basic durability requirement 7
7.2 Formats for checking durability 8

8 Design life of a structure and its components, tD 11
8.1 Structure 11
8.2 Components 11
8.3 Component service life related to the design life of the structure 11
8.4 Difficulty and cost of maintenance or replacement 11
8.5 Consequences of failure 11
8.6 Selection of target reliability 11

9 Predicted service life, tSP 12
9.1 General 12
9.2 Prediction based on experience 13
9.3 Prediction based on modelling 13
9.4 Prediction based on testing 14

10 Strategies for durability design 14

Annex A (informative) Examples of the application of the limit-states method 15

Annex B (informative) Examples of influences (structure environment) and agents (environmental action) 26

Annex C (informative) Examples of transfer mechanisms 32

Annex D (informative) Environmental actions for structural materials and their control 34

Annex E (informative) Procedures for ensuring durability 37

Bibliography 39
