

# DIN 18800-2:2008-11 (E)

## Steel structures - Part 2: Stability - Safety against buckling of linear members and frames

---

### Contents

Page

Foreword .....	4
<b>1</b> <b>General</b> .....	<b>5</b>
1.1 <b>Scope</b> .....	5
1.2 <b>Normative reference</b> .....	5
1.3 <b>Terms and definitions</b> .....	5
1.4 <b>Common notation</b> .....	6
1.5 <b>Ultimate limit state analysis</b> .....	9
1.5.1 <b>General</b> .....	9
1.5.2 <b>Ultimate limit state analysis by elastic theory</b> .....	12
1.5.3 <b>Ultimate limit state analysis by plastic hinge theory</b> .....	13
<b>2</b> <b>Imperfections</b> .....	<b>13</b>
2.1 <b>General</b> .....	13
2.2 <b>Bow imperfections</b> .....	14
2.3 <b>Sway imperfections</b> .....	15
2.4 <b>Assumption of initial bow and coexistent initial sway imperfections</b> .....	18
<b>3</b> <b>Solid members</b> .....	<b>18</b>
3.1 <b>General</b> .....	18
3.2 <b>Design axial compression</b> .....	19
3.2.1 <b>Lateral buckling</b> .....	19
3.2.2 <b>Lateral torsional buckling</b> .....	21
3.3 <b>Bending about one axis without coexistent axial force</b> .....	22
3.3.1 <b>General</b> .....	22
3.3.2 <b>Lateral and torsional restraint</b> .....	22
3.3.3 <b>Analysis of compression flange</b> .....	28
3.3.4 <b>Lateral torsional buckling</b> .....	30
3.4 <b>Bending about one axis with coexistent axial force</b> .....	32
3.4.1 <b>Members subjected to minor axial forces</b> .....	32
3.4.2 <b>Lateral buckling</b> .....	33
3.4.3 <b>Lateral torsional buckling</b> .....	34
3.5 <b>Biaxial bending with or without coexistent axial force</b> .....	35
3.5.1 <b>Lateral buckling</b> .....	35
3.5.2 <b>Lateral torsional buckling</b> .....	38
<b>4</b> <b>Single-span built-up members</b> .....	<b>39</b>
4.1 <b>General</b> .....	39
4.2 <b>Common notation</b> .....	40
4.3 <b>Buckling perpendicular to void axis</b> .....	41
4.3.1 <b>Analysis of member</b> .....	41
4.3.2 <b>Analysis of member components</b> .....	42
4.3.3 <b>Analysis of panels of battened members</b> .....	44
4.4 <b>Closely spaced built-up battened members</b> .....	45
4.5 <b>Structural detailing</b> .....	47
<b>5</b> <b>Frames</b> .....	<b>47</b>
5.1 <b>Triangulated frames</b> .....	47
5.1.1 <b>General</b> .....	47
5.1.2 <b>Effective lengths of frame members designed to resist compression</b> .....	48
5.2 <b>Frames and laterally restrained continuous beams</b> .....	51

5.2.1	Negligible deformations due to axial force .....	51
5.2.2	Non-sway frames .....	52
5.2.3	Design of bracing systems .....	53
5.2.4	Analysis of frames and continuous beams .....	54
5.3	Sway frames and continuous beams subject to lateral displacement .....	56
5.3.1	Negligible deformations due to axial force .....	56
5.3.2	Plane sway frames .....	56
5.3.3	Non-rigidly connected continuous beams .....	62
6	Arches .....	62
6.1	Axial compression .....	62
6.1.1	In-plane buckling .....	62
6.1.2	Buckling in perpendicular plane .....	67
6.2	In-plane bending about one axis with coexistent axial force .....	71
6.2.1	In-plane buckling .....	71
6.2.2	Out-of-plane buckling .....	72
6.3	Design loading of arches .....	73
7	Straight linear members with plane thin-walled parts of cross section .....	74
7.1	General .....	74
7.2	General rules relating to calculations .....	75
7.3	Effective width in elastic-elastic method .....	77
7.4	Effective width in elastic-plastic method .....	81
7.5	Lateral buckling .....	81
7.5.1	Elastic-elastic analysis .....	81
7.5.2	Analyses by approximate methods .....	81
7.6	Lateral torsional buckling .....	85
7.6.1	Analysis .....	85
7.6.2	Axial compression .....	85
7.6.3	Bending about one axis without coexistent axial force .....	85
7.6.4	Bending about one axis with coexistent axial force .....	86
7.6.5	Biaxial bending with or without coexistent axial force .....	86
Annex A (informative) List of withdrawn or replaced standards and technical rules to which reference is made .....		87
Bibliography .....		89
